OPEN IN TWO YEARS

Koa Cases Received for
Bishop Museum's
New Wing.

Big, heavy packing cases were deposited yesterday on the front steps of the Bishop Museum and were later carried into the handsome new wing just completed where they were opened and from them were taken beautiful koa wood cases. They were among the first of the large number of pieces which are being made by a furniture factory at Stillwater, Minnesota, from koa wood shipped from the Hawaiian Islands to the factory. Prof. Brigham, the curator of the Bishop Museum, stated yesterday, that although the present large shipment would contain many specimens, yet not one-tenth of the entire lot had thus far been received.

Among the pieces just received are sections of book-cases which have been eagerly awaited as many of the books and pamphlets of the Museum are piled up in heaps and nothing can be done to classify them until the cases are here and set up. The lack of such cases has been a serious impediment to the Museum, not only for the officials, but for outsiders who have desired to make use of the volumes for reference.

All the cases are especially designed to fit spaces in the new building and include those termed wall cases and table or floor cases. As there are two galleries both surrounding the lower floor space, and as there are already enough specimens on hand to fill them, the Bishop Museum will soon show a classified amount of natural history and ethnological features which cannot but be of interest not only to Honolulu but to the outside world as well.

Suspended from the skylighted roof of the new wing is a sperm whale, the frame being the skeleton of a leviathan taken in the Pacific ocean.

Owing to the care with which the specimens will have to be arranged after the koa cases are all here, Prof. Brigham is of the opinion that this section of the museum will not be ready to open to the public for at least two years.

NEW TEACHERS ARE APPOINTED

A number of new teachers were appointed at yesterday's morning's meeting of the Board of Education. Among these were Miss Eleanor Pires and Mrs. L. P. Marques, who taught at a Portuguese institution, which was abandoned in order that the pupils might attend government schools.

The following were the appointments made:

Portuguese School: Miss M. Mapuana Smith and Miss Helen C. Smith from Kailua and Miss Jennie Nielsen from Kailua.
Kailua School: Miss Kate McIntyre and Miss Almee Mossman from Royal and Miss Eleanor Pires, formerly of Portuguese School.
Royal School: Miss Sadie McLain from Practice School and Mrs. L. P. Marques, formerly of Portuguese School.
Kailua School: Miss Johanna Neves, Normal Certificate (vice Nielsen).
Royal School: Miss Ada Lyett for new room.
Haalea School: Miss Franc Eaton vice Miss Ellen R. Pierce (resigned).
Kailua School: J. Kuhns vice D. B. Kuhns, transferred.
Waipio School: D. B. Kuhns vice J. Kuhns, transferred.
Kaupo School: Miss Annie K. Patsen Chung, normal certificate, vice Miss Marian Pihl, resigned.
Kapaa School: Miss Mollie Aloia, normal certificate, vice De Silva, transferred to Kailua.
Kailua School: Miss Mary Yoshioka, normal certificate, vice Miss Alice D. Ewart, resigned.
Hanalei School: Miss Janet Hastie, normal certificate, additional teacher.

DR. RODGERS TALKS OF PHYSIOLOGY

Dr. C. T. Rodgers of the Board of Education gave an interesting talk yesterday afternoon at the training school on Physiology and Hygiene. He discussed the methods of teaching the science and dwelt particularly on the latter branch of his subject. The last portion of his talk was on the subject of the effects of alcohol upon the system. He called the attention of the teachers to the law bearing upon the teaching of temperance hygiene in the schools and set out in great, clear terms the effects of stimulants on the system. He said the effects of a stimulant, such as the application of the whip to a horse going up hill with a load, could not be in any way confounded with food, and showed the fallacy of such reasoning. He was greeted with applause and a vote of thanks was given him at the conclusion of his address.

KILL THE DANDRUFF GERM

Or Your Hair Will Fall Out Till You Become Bald.

Modern science has discovered that dandruff is caused by a germ that digs up the scalp in scales, as it burrows down to the root of the hair, where it destroys the hair's vitality, causing falling hair, and, ultimately, baldness. After Prof. Unna of Hamburg, Germany, discovered the dandruff germ, all efforts to find a remedy failed until the great laboratory discovery was made which resulted in Newbro's Herpicide. It alone of all other hair preparations kills the dandruff germ. Without dandruff, hair grows luxuriantly. "Destroy the cause, you remove the effect."

Two Kinds of Canned Goods

There are two kinds of canned goods—S & W and the other kind. S & W goods are preeminently the choicest in the market and are rapidly gaining in popularity. We guarantee them—money back if they are not satisfactory. The discriminating housekeeper insists on getting the S & W brand. The S & W label is attractive but the real attractiveness is within the can. Try these goods—you will not be disappointed.
